FORMATION OF TEAM INTERACTION SKILLS IN POLICE DEPARTMENTS

Paper is devoted to the topical issues of training of police service in terms of psychological readiness to perform professional activities; both theoretical and practical aspects are covered. Given the importance of the subject special attention is paid to one of the priority areas of training personnel, namely – strengthening team interaction and compatibility of the National Police units. One of theoretical and methodological approaches to the formation of group cohesion is considered, methods for evaluating individual typological and personal qualities of the police in terms of group interaction are defined, as well as given as an example of practical exercises that allow you to form police skills of team interaction during training.

Keywords: team interaction, psychological training, training practice, teambuilding.
